Predictability and Flexibility in the Law of Maritime Delimitation Yoshifumi Tanaka 2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation, incorporating all new cases and State practice in this field. As with all types of law, the law of maritime delimitation should possess a degree of predictability. On the other hand, as maritime delimitation cases differ, flexible considerations of geographical and non-geographical factors are also required in order to achieve equitable results. How, then, is it possible to ensure

predictability while taking into account a number of diverse factors in order to achieve an equitable result? This is the question at the heart of the law of maritime delimitation. This book explores a well-balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question: first it reviews the evolution of the law of maritime delimitation; second, it undertakes a comparative study of the case law and State practice; and third, it critically assesses the law of maritime delimitation in its current form.

The Structure and Process of International Law Ronald St. J. MacDonald 1986-02-24

Contemporary Issues in International Law B.C. Nirmal 2018-02-13 This book explores the changing nature of international law and its ability to respond to the contemporary issues related to international environment, trade and information technology. The evolution of international law has reached a stage where we are witnessing diminishing power of the state and its capacity to deal with the economic matters challenging the existing notions of territory and sovereignty. Recent trends in international law and international relations show that states no longer have exclusive control over the decision-making process at the global level. Keeping this in mind, the book brings together the perspectives of various international and national scholars. The book considers diverse issues such as, sustainable development, climate change, global warming, Rio+20, technology transfer, agro-biodiversity and genetic resource, authority for protection of environment, human right to water, globalization, human rights, sui generis options in IP laws, impact of liberalization on higher education, regulation of international trade, intellectual property rights, collective administration of copyright, broadcast reproduction rights, implementation of copyright law, communication rights under copyright law, arbitration for IP disputes, doctrine of exhaustion of rights, trans-border reputation of trademark, information as an asset, cyber obscenity and pornography, e-governance, taxation of e-commerce, computer crime, information technology, domain names, research

excellence in legal education, ideological perspective on legal education, challenges for law teachers, and clinical legal education. The topics, though diverse, are closely interrelated, with the common concern throughout being that the global environment, international trade, information technology and legal education need appropriate national normative and institutional responses as well as the global cooperation of members of the international community. Presenting reflections of a number of Asian, African and European scholars on these varied facets, the book is of great value to scholars, practitioners, teachers and students associated with contemporary international law.

Merrills' International Dispute Settlement John Merrills 2022-02-28

The fully revised seventh edition of this successful textbook explains the legal and diplomatic methods and organisations used to solve international disputes, how they work and when they are used. It looks at diplomatic (negotiation, mediation, inquiry and conciliation) and legal methods (arbitration, judicial settlement). It uses many, up-to-date examples of each method in practice to place the theory of how the law works in real-life situations, demonstrating the strengths and weaknesses of different methods when they are used. Fully updated throughout, the seventh edition includes a new introduction explaining the common principles of settlement and a chapter on investor-state arbitration, as well as recommended further readings at the end of each chapter. It is an essential resource for advanced undergraduate and postgraduate courses on international dispute settlement.

The International Legal Régime for

the Protection of the Stratospheric Ozone Layer O. Yoshida 2001-04-18 The first edition of Professor Yoshida's monograph, *The International Legal Régime for the Protection of the Stratosphere Ozone Layer*, has been the most comprehensive contemporary study of the international ozone régime. In the second revised edition, he analyses important developments of the ozone treaty régime.

Maritime Boundary Delimitation: The Case Law Alex G. Oude Elferink 2018-03-15 The law of maritime delimitation has been mostly developed through the case law of the International Court of Justice and other tribunals. In the past decade there have been a number of cases that raise questions about the consistency and predictability of the jurisprudence concerning this sub-field of international law. This book investigates these questions through a systematical review of the case law on the delimitation of the continental shelf and the exclusive economic zone. Comprehensive coverage allows for conclusions to be drawn about the case law's approach to the applicable law and its application to the individual case. *Maritime Boundary Delimitation: The Case Law* will appeal to scholars of international dispute settlement as well as practitioners and academics interested in the law concerning the delimitation of maritime boundaries.

The International Legal Order: Current Needs and Possible Responses James Crawford 2017-04-03 This volume of essays addresses some of the most significant issues of contemporary international law. It particularly focuses on questions relating to international humanitarian law, the law of the sea, human rights, the use of force, international environmental law, and the settlement of international disputes. Recent

developments in some other issues of international law such as State immunity and State responsibility are also dealt with. The Work contains a number of articles in French and is offered as a tribute to the prominent Iranian Professor of International Law, Djamchid Momtaz, on the occasion of his 75th birthday.

The International Legal Régime for the Protection of the Stratospheric Ozone Layer Osamu Yoshida 2018-11-29 The first edition of Professor Yoshida's monograph, *The International Legal Régime for the Protection of the Stratosphere Ozone Layer*, provided a renowned and comprehensive contemporary study of the international ozone régime. In the second revised edition, the author analyses important developments in the ozone treaty régime.

Mariner Umweltschutz durch Meeresschutzgebiete im jurisdiktionsfreien Raum der Hohen See Frank Wacht 2018-10-24 Um dem stetig wachsenden und sich weiter seewärts verlagernden Nutzungsdruck der Meere entgegenzutreten, ist es erforderliche Schutzmaßnahmen zu ergreifen. Der Autor befasst sich speziell mit einem Schutzinstrument, das bislang verhältnismäßig häufig in küstennäheren Meereszonen eingeführt wurde: der Ausweisung von Meeresschutzgebieten (MPAs). Dabei liegt der Fokus konkret auf der Einführung dieser gebietsschützenden Managementinstrumente auf der Hohen See. Neben ihrer Entwicklung und der Frage nach deren Erforderlichkeit, wird ausführlich die derzeitige Rechtslage, insbesondere im Hinblick auf eine Verpflichtung zur Ausweisung, beleuchtet. Zudem findet eine Auseinandersetzung mit der Frage einer Drittstaatenbindung an die jeweiligen Schutzbestimmungen von Hohe See-MPAs statt. Schließlich enthält die Arbeit auch eine

Darstellung der naturwissenschaftlichen Kriterien zur Identifizierung sog. "ecologically or biologically significant areas", die als Grundlage für adäquate Standorte potenzieller MPAs dienen können.

Recent Developments in Space Law R.

Venkata Rao 2017-10-15 This book offers a compendium of diverse essays on emerging legal issues in outer space, written by experts in the field of Space Law from different parts of the globe. The book comprehensively addresses opportunities in space and the inevitable legal challenges that these space activities pose for mankind. It explores the increasing role of private sector in outer space, which calls for a review of policy and legislation; invites opinio juris from law scholars for ensuring the applicability of the Outer Space Treaty on all states without ratification and universal abidance with Space Law without demur; reflects upon the challenges for the global space community involved in implementing a more effective approach to international space governance; and considers the use of domestic laws, and the consequent need for legal reform, to encourage broader engagement with commercial space innovation. Further, the book delves into the adequacy of existing international liability regime to protect space tourists in the event of a space vehicle accidents; examines the increasing use of space for military activities and canvasses how International Law may apply to condition behaviour; highlights the challenges of scavenging space debris; calls for protections of space assets; touches upon the legal regime pertaining to ASAT and discusses other ways of creating normative instruments, which also come from other areas and use other methods. Given its

comprehensive coverage of opportunities in space and the inevitable legal challenges that they pose, the book offers a valuable resource for students, researchers, academics and professionals including government officials, industry executives, specialists, and lawyers, helping them understand essential contemporary issues and developments in Space Law.

International Development Law Petra Minnerop 2019 This volume brings together articles on international development law from the Max Planck Encyclopedia of Public International Law, the definitive reference work on international law. It provides an invaluable resource for scholars, students, and practitioners of international development law, giving an accessible, thorough overview of all aspects of the field. Each article contains cross-references to related articles, and includes a carefully selected bibliography of the most important writings and primary materials as a guide to further reading. The Encyclopedia can be used by a wide range of readers. Experienced scholars and practitioners will find a wealth of information on areas that they do not already know well as well as in-depth treatments on every aspect of their specialist topics. Articles can also be set as readings for students on taught courses.

The Third World and International

Order Antony Anghie 2021-07-26 This collection of essays explores different dimensions of the relationship between the third world and international law. The topics covered include third world approaches to international law, non-state actors and developing countries, feminism and the third world, foreign investment, resistance and international law, and territorial disputes and native

peoples. It is a further contribution to the work done by scholars intent on elaborating what might be termed Third World Approaches to International Law (TWAAIL). This initiative seeks to continue and further develop the important work that has been done over many decades, particularly by scholars and jurists from the third world, to construct an international law which is sensitive to the needs of third world peoples. This body of scholarship has attempted to extend and expand the concerns and materials of international law. The essays in this volume are animated by these same motives at a time when unprecedented issues confront third world peoples, particularly since the contemporary international system appears to be disempowering third world peoples, intensifying inequality between the North and the South, and indeed, importantly, within the North and the South. TWAAIL scholars attempt to look afresh at the history of colonial international law, engage previous trends in third world scholarship in international law, take cognizance of the dramatic changes which have characterized the body of international law in the last few decades from the perspective of third world peoples, record their resistance to unjust and oppressive international laws, and advance new approaches that address their needs and concerns. These are the broad themes and concerns which animate this collection of essays.

Legal Sources in Business and Human Rights Martina Buscemi 2020-06-02

Netherlands Yearbook of International Law 2012 Janne Elisabeth Nijman 2013-06-12
The Netherlands Yearbook of International Law (NYIL) was first published in 1970. It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union. With this volume on 'Legal Equality and the International Rule of Law', the Netherlands Yearbook of International Law celebrates Pieter Kooijmans' academic, diplomatic, and judicial career by picking up on an important subject in his early writings, the principle of legal

equality of states. This volume studies if and how the principle of legal equality of states is still important in the international legal order of the early 21st century. In particular, this volume examines the principle's current relevance, e.g., in a pluralistic legal order, its relation to hegemony in international relations and international law, and how it functions in contemporary international organisations. The principle is further explored in the fields of international criminal law, international humanitarian law, and the international law of sovereign immunity.

An Index to Common Law Festschriften Michael Taggart 2006-09-01 This is the first ever index of contributions to common law Festschriften and fills a serious bibliographic gap in the literature of the common law. The German word Festschrift is now the universally accepted term in the academy for a published collection of legal essays written by several

authors to honour a distinguished jurist or to mark a significant legal event. The number of Festschriften honouring common lawyers has increased enormously in the last thirty years. Until now, the numerous scholarly contributions to these volumes have not been adequately indexed. This Index fills that bibliographic gap. The entries included in this work refer to some 296 common law Festschriften indexed by author, subject keyword, editor, title, honorand and date. It therefore includes over 5,000 chapter entries. In addition, there are more than a thousand entries of English language contributions to predominantly foreign language, non-common law legal Festschriften from Germany, Austria, Switzerland, Denmark, Finland, Iceland, Norway and Sweden.

Global Challenges and the Law of the Sea Marta Chantal Ribeiro 2020-05-23
This book analyses a selection of challenges in the implementation and application of the 1982 UN Convention on the Law of the Sea (UNCLOS), focusing on several areas: international organizations, fisheries, security, preserving marine biodiversity, dispute settlement, and interaction with other areas of international law. UNCLOS has been described as the Constitution for the Oceans. It sets out the fundamental rights, obligations and jurisdictions of States regarding the access to, uses and management of the oceans and seas and their resources. It balances States' diverse and sometimes conflicting interests, such as conflicting uses of space, against navigational interests and the protection of the marine environment. UNCLOS is the first global treaty to include comprehensive obligations on the protection and preservation of the marine environment, including the

conservation of living marine resources. These are often common or cross-border challenges, which can only be addressed through international cooperation. The book is divided into three thematic parts. The first concerns the role of international organizations in ocean governance. It includes twelve chapters covering a very diverse set of issues, both materially and geographically, that demonstrate the importance of coordinated actions on the part of multiple States for obtaining harmonized solutions regarding the pursuit of activities in maritime spaces (in connection with e.g. navigation, fisheries or maritime security). The second part concerns the relevance of dispute settlement mechanisms for understanding the international law of the sea and the international legal framework within which the actions of the great maritime powers take place. It is composed of three chapters, examining stakeholders' role in dispute settlement, the position taken by China and the Russian Federation regarding international litigation in maritime spaces, and how the South China Sea Award may be relevant to the debate on the international legal concepts of rock and island. In turn, the third part addresses current discussions on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction. Its seven chapters report on the status quo of the ongoing negotiations for a new international legal regime of the high seas, and the establishment and operationalization of environmental regimes for international maritime spaces.

Recueil Des Cours, 1989-IV Académie de droit international de La Haye 1990-11-01 The Academy is an institution for the study & teaching

of public & private international law & related subjects. Its purpose is to encourage a thorough & impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical & practical aspects of the subject, including legislation & case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law. This volume contains: Reform, but not Revolution. General Course on Private International Law, by Peter M. NORTH Questions de droit international prive et dommages catastrophiques, par Tito BALLARINO. *Völkerrecht* Oliver Diggelmann 2018-09-01 Von der frühen Neuzeit über die Völkerbundära bis in die Gegenwart: Im ersten Teil dieses Einführungswerks wird die Entwicklung und Geschichte des Völkerrechts beleuchtet. Der zweite Teil befasst sich mit dem Völkerrecht als Rechtsordnung und vermittelt die wichtigsten Grundlagen. Interessante Beispiele erläutern das Wissenswerte zum Thema in handlicher, leicht lesbarer Form. Auch die Rolle der Schweiz wird in diesem Zusammenhang näher betrachtet. Damit leistet Oliver Diggelmann einen wichtigen Beitrag zur aktuellen Debatte über die sogenannte Selbstbestimmungsinitiative, die den Vorrang des Verfassungsrechts vor dem Völkerrecht in der Schweizer Verfassung verankern möchte. International Law and Sustainable Development Deputy General Counsel Advisory Services Legal Vice Presidency David Freestone 1999 Written by judges of the International Court of Justice and the International Tribunal for the Law of the Sea and other leading experts, this collection of essays deals with the most recent

developments in international environmental law since 1992.

The structure and process of international law Ronald St John MacDonald 1983-10-17

Contemporary Developments in International Law Rüdiger Wolfrum 2015-12-04

Due Diligence in the International Legal Order Heike Krieger 2021-02-03

This book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law. Looking at current tendencies towards proceduralisation and more proactive risk management, it reveals the promises and limits of due diligence as a concept for enhancing accountability and compliance.

Auswirkungen des Meeresspiegelanstiegs auf maritime Grenzen Eike Blitza 2019-04-03

Das Buch geht der Frage nach, ob und inwiefern sich Meeresspiegelinduzierte Veränderungen der Küstenlinien auch im Verlauf maritimer Grenzen widerspiegeln. Nach Untersuchung der maßgeblichen Vorschriften des Seerechtsübereinkommens (SRÜ) kommt die Arbeit zu dem Ergebnis, dass Veränderungen des Küstenverlaufs Auswirkungen auf maritime Grenzen haben können, das Ausmaß der Veränderung allerdings von der konkreten Art der Grenze und deren Entfernung zur Basislinie abhängt. Global betrachtet birgt die Beweglichkeit der Seegrenzen ein erhöhtes Konfliktpotential, denn sie wird Unsicherheit über bestehende Grenzverläufe verursachen. Seegrenzen sollten daher dauerhaft stabilisiert

werden. Der Autor belegt, dass dies auf Grundlage des geltenden Rechts nicht sinnvoll gelingen wird. Nur durch Änderung des SRÜ oder der Herausbildung von neuem Völkergewohnheitsrecht ließe sich verhindern, dass das internationale Seerecht die Folgen des durch den Meeresspiegelanstieg bedingten Landverlusts nicht noch verschlimmert.

Remedies before the International Court of Justice Victor Stoica 2021-02-28 Understanding exactly how the International Court of Justice applies the remedies of international law is vital in order to determine its prioritisation of remedies and its rationales for resolving interstate disputes. This analysis also shows whether the framework of remedies of international law, designed by the International Law Commission through the Articles on Responsibility of States for Internationally Wrongful Acts, is strictly observed by the International Court of Justice. This is among the few systemic studies in the field of remedies, contrasting the theoretical controversies with a complete survey of the large set of requests that have been submitted before the ICJ. International lawyers, agents of states and diplomats will be able to identify the relevant case-law for each remedy in order to frame more effective requests to the Court. This study will also be of interest to researchers, practitioners, judges, policymakers, and graduate students.

Defenses in Contemporary International Criminal Law Geert-Jan G. J. Knoops 2008 The Second Edition of "Defenses in Contemporary International Criminal Law" ventures farther into this uneasy territory than any previous work, offering a meticulous analysis of the case law in the post World War II Military

Tribunals and the ad hoc tribunals for Rwanda and the Former Yugoslavia, with particular attention to the defenses developed, their rationales, and their origins in various municipal systems. It analyzes the defense provisions in the charters and statutes underlying these tribunals and the new International Criminal Court, while examining the first judgment in this field rendered by the Special Court for Sierra Leone, on June 20, 2007. The conceptual reach of this work includes not only the defenses recognized in the field's jurisprudence and scholarship (superior orders, duress, self-defense, insanity, necessity, mistake of law and fact, immunity of States), but also presents a strong case for the incorporation of genetic and neurobiological data into the functioning of certain defenses. Procedural mechanisms to invoke these defenses are also addressed.

Furthering the Frontiers of International Law: Sovereignty, Human Rights, Sustainable Development Niels M. Blokker 2021-07-19 This rich collection focuses on the broad research interests of Professor Nico Schrijver, in whose honour it was created. Written by a wide range of international scholars affiliated with Leiden University's Grotius Centre for International Legal Studies, the essays reflect Professor Schrijver's important contribution to academia and practice, particularly in the fields of sovereignty, human rights and sustainable development. The authors aim to reflect on changes in international law and on new developments in the diverse fields they explore. "Furthering frontiers" is the research theme of the Grotius Centre. Its exploration in this thought-provoking volume is a fitting homage to Nico Schrijver's achievements on the occasion of his

retirement as Chair of Public International Law of Leiden University.

Contemporary Issues in International Environmental Law

M. Fitzmaurice 2009-01-01 . . . Highly recommended as a key contribution to the literature. It fulfils its title in being contemporaneous, but more than that it also provides a subtle critique of how many international environmental lawyers have approached their subject. . . this book will be an essential read for anyone interested in the subject. British Yearbook of International Law This book presents an interesting, scholarly read. . . an invaluable reference asset, to law students, researchers, policy makers and non-state actors with interest in environmental regulation and governance. Priscilla Schwartz, Journal of Environmental Law This is a thoughtful and well-researched study of current issues in international environmental law. Malgosia Fitzmaurice's collection of essays is a welcome addition to the literature in this rapidly developing area of the law: it provides perspective on the environmental law

issues discussed, but always against the background of the broader concepts and principles of general international law. James Crawford, University of Cambridge, UK The central aim of this insightful book is to illuminate how many concepts in international environmental law such as the precautionary principle and sustainable development are taken for granted. These problematic issues are very much still evolving and subject to heated debate between scholars as well as between states. The author explores these controversies viewing them as a positive development within a field that is in a constant state of flux. Areas discussed include the convergence of human rights with environmental issues and the quest for the human right to a clean environment. The book also clearly demonstrates that international environmental law cannot be analysed in isolation since it greatly influences the development of general international law. Taking full account of the most recent decisions of international courts and tribunals as well as the most up-to-date scholarly analysis, Contemporary Issues in International Environmental Law is a timely and important resource for legal scholars, under- and post-graduates and practitioners alike.
