Cognition Thomas A. Farmer 2019-01-14 The study of human cognitive processes provides insight into why we act or react and can help us predict future behaviors. In *Cognition*, authors Thomas Farmer and Margaret Matlin present an engaging and highly relatable examination of how these processes work, and how they are responsible for the way we perceive and interpret the world around us. Broad in scope without sacrificing depth of detail, this text emphasizes the link between conceptual cognitive psychology and real-world experience; case studies, current trends, and historical perspectives merge to provide a comprehensive understanding of core principles and theories.
