(ESD) policy is being translated into formal school education in India. Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-

making on the sustainable use of natural resources.

[The Asset of Cultural Pluralism](#) Carola Conle 2007 Times of transition can be viewed as times of crisis -- epistemologically, morally and socially. They also can come to be seen as fortuitous junctures where the impossibility of preserving old patterns gives rise to a leap into new, productive configurations. In the teaching and learning situations presented here, it is assumed that such a leap is possible among members of a pluralist society. Diversity must work as an asset rather than a liability for minority as well as mainstream candidates. The curriculum needs to be inquiry-based and should be engaging

emotionally and imaginatively, as well as intellectually.

DK Workbooks: Geography, Sixth Grade 2016 Perfect for children ages 11 and 12, this workbook extends the geography knowledge and map-reading skills of sixth graders and contains curriculum-aligned objectives that include using different map projections and informational maps, locating the world's major physical features, and reinforcing knowledge about the United States, the continents, and specific world regions. Designed to support curriculum standards, this series is developed with leading educational experts to build confidence and understanding. Each leveled workbook, for children ages 3-9, is packed with activities and challenges, offering the beneficial

repetition and cumulative learning that lead to mastery. Fact boxes on each page give a simple overview of the topics being covered, review the basics, and often offer an example of the task at hand. The exercises themselves reinforce key geography topics including map reading, compass directions, continents, countries and states, borders, bodies of water, and more.
