Educational Values and Cognitive Instruction Lorna Idol 2013-12-16 This volume is a comprehensive guide to state-of-the-art research on thinking, cognitive instruction, social values, and reform. Cognitive instruction for at-risk students is discussed in great detail along with a thorough examination of the teaching of thinking skills from the viewpoint of educational values and school culture. The issues of thinking, learning, and cognitive instruction are linked to the educational reform movement from numerous perspectives. Specifically, the reader can better anticipate which aspects of research on thinking will conflict with existing paradigms and which aspects of schooling will be most resistant to change.

Islands in the Sky Rose Hammond 2013-01-11 Homer provides an enormous challenge to the student; the potentialities of these lengthy texts are legion and the scholarship vast. The author has relied upon her knowledge of symbolic discourse to make a fresh study of the Odyssey, prioritising early neighbouring religions, their mythology, and shamanic practice. The latter has yielded particularly rich material concerning the axis of the world (axis mundi) as a route to the stars and the world of the gods. Man's shared experience of the night skies has also provided some remarkably consistent patterns for the geography of an Otherworld in the skies and the means to reach the gods residing there. By applying world-wide motifs of the soul journey, the initiatory process and established points of transformation along a solar path, it has been possible to recast the hero's sea voyage in cosmic terms and give a celestial homeland to the many islands visited by Odysseus and his companions. The result gives a surprising twist to the meaning of the epic and reveals Homer the poet as both philosopher and student of the cosmos. The 'wine-dark sea' is revealed as none other than the night sky which serves as backdrop to the hero's adventures among the stars, and Ithaka itself with its many conflicts finds a place at the very centre of the known universe of Bronze Age Greece.

Greek Classics 2nd Edition Teacher's Guide Fran Rutherford 2011-10-14 Fran Rutherford's two-volume Greek Classics (Student Book and Teacher's Guide - sold individually) provides an ideal course for parents who homeschool high school students and for teachers of secondary education who wish to introduce their students to the great books of Western civilization, "the best that has been thought and said," in Matthew Arnold's famous phrase. The choice of great books is appropriate, balanced, and coherent-each book illuminating an important facet of Greek thought and culture and embodying the moral wisdom of the Greek mind. The course covers Homer's Iliad and Odyssey, selections from the histories of Herodotus, Thucydides, and Xenophon, Aeschylus's trilogy *The Oresteia*, Sophocles' *Oedipus* trilogy of *The Three Theban Plays*, Aristophanes' *The Clouds*, and Plato's *Republic*-a rich banquet for the mind that integrates history, literature, and philosophy for a beginning humanities student. Comprised of brief but substantive introductions to the authors and to the works, the book then poses simple but penetrating questions about each chapter or major part of the book. It also presents probing questions for further reflection and discussion. For example, the questions at the end of a chapter test simple reading comprehension: "How does Odysseus convince Penelope that he is who he says he is?" "What proof of his identity does Odysseus give his father?" The questions for further thought are contemplative and thought-provoking: "What do you learn about Greek beliefs from Odysseus's visit to Hades?" and "How is our notion of hospitality different from that of the Greeks?" The Teacher's Guide of course offers the answers to the factual questions, but it provides special insights to address the questions for further thought. How does the modern practice of hospitality differ from Greek customs? "Another difference is that the Greeks thought strangers were sent from the gods, so they had a religious duty to be hospitable. That idea was also expressed in the scriptures-notably in Hebrews 13:2: 'Do not neglect to show hospitality to strangers, for thereby some have entertained angels unawares'." The questions and answers are always lucid, straightforward

and penetrating. The other features of the book that make it a valuable resource are the maps, illustrations, vocabulary, and explanation of technical terms. The maps of the Greek world and the Persian Empire, a diagram of the Greek theater in the round, the "words to know section" at the end of each chapter (e.g., "suppliant," "sycophant," "libation," "paeon"), and the definition of Greek words like *parados*, *agon*, and *deuterononist* all broaden the mind and provide breadth and depth to the course. In short, these two volumes provide a bone fide traditional, classical liberal arts education that introduces students to the reality of philosophical or universal truth, to the unchanging natural moral law that explains the nature of tragedy and the events of history, and to the Greeks' passionate love of knowledge and desire for glory. It transmits to students the patrimony of Greek civilization—the culture that discerned the difference between living and living well, between being "civilized" and being "barbaric." For students to know these perennial truths about human nature and the human condition is the beginning of wisdom—the goal of all true education.
