The Struggles of Identity, Education, and Agency in the Lives of Undocumented Students Aurora Chang 2017-10-17 This book weaves together two distinct and powerfully related sources of knowledge: the author's journey and transition from a once undocumented immigrant from Guatemala to a hyperdocumented academic, and five years of on-going national research on the identity, education, and agency of undocumented college students. In interlacing both personal experiences with findings from her empirical qualitative research, Chang explores practical and theoretical pedagogical, curricular, and policy-related discussions around issues that impact undocumented immigrants while provide compelling rich narrative vignettes. Collectively, these findings support the argument that undocumented students can cultivate an empowering self-identity by performing the role of infallible cultural citizen.

**New Scholarship in Critical Quantitative Research, Part 1: Studying Institutions and People in Context** Frances K. Stage 2014-06-24 This volume presents work focused on underrepresented persons in a variety of levels of higher education. Each scholar has used critical quantitative approaches to examine access and/or success in the higher education arena. Their scholarship pushes the boundaries of what we know by questioning mainstream notions of higher education through: the examination of policies the re-framing of theories and measures the reexamination of traditional questions for nontraditional populations. The work is divergent, but the commonality of the presentations lies in each scholar's critical approach to conventional quantitative scholarship. Their research highlights inequities and explores factors not typically included in conventional quantitative analysis. This is the 158th volume of this Jossey-Bass quarterly report series. ***Handbook for Student Affairs in Community Colleges*** Ashley Tull 2015-06-19 In addressing the unique issues related to the delivery of student services in the community college setting, this book fills a longstanding need to provide practitioners with a contextual framework for their work. Starting by providing the historical context to the development of student affairs in community colleges, this handbook describes the organization of key functions and current practice, and looks at the specific constraints, opportunities, changes and future challenges that practitioners face. Community colleges are grappling with: the realities of shrinking resources; an increasingly diverse and disparate student body, with many attending part-time; demands for greater accountability; a generational change in leadership; and pressures to expand their missions as well as adopt educational technology – all of which have an impact on the role of student affairs. Among the topics covered are: Partnering with Academic Affairs; Financing Student Affairs; Legal and Policy Issues; Strategic Planning and Assessment; Accreditation and Accountability; Technology for Communication and Engagement; Academic Support Services; Student Life and Student Engagement Programs and Services; Enrollment Management; and Services for Special Populations. ***Crafting Culturally Efficacious Teacher Preparation and Pedagogies*** Belinda Bustos Flores 2018-03-07 *Crafting Culturally Efficacious Pedagogies and Practices* is based on cultural efficaciousness derived from the work of the nationally recognized Academy for Teacher Excellence at The University of Texas at San Antonio. The book is grounded in a research-based model, situated within the needs of the school-local community, and based on collaborative partnerships. Given the under-representation of ethnic/racial minority teachers, to accomplish social justice, all teachers must become culturally efficacious. In this book, authors provide an overview of the culturally efficacious evolution model used to anchor teacher preparation and present the culturally efficacious observation protocol as a tool to assess teachers' development. The authors present four exemplar case studies of culturally efficacious teachers who have a strong identity, a positive teaching cultural efficacy, are critical reflective thinkers,

and believe that they can make difference in minority students' lives. As culturally efficacious teachers, these educators are also committed to social justice and equitable education. Cross-case findings reveal that the critical teacher development model serves as a culturally sustainable pedagogy that effectively prepares teachers in the field.

***At the Intersection*** Robert Longwell-Grice 2021-05-03 The experiences of first-generation college students are not monolithic. The nexus of identities matter, and this book is intended to challenge the reader to explore what it means to be a first-generation college student in higher education. Designed for use in classrooms and for use by the higher education practitioner on a college campus today, *At the Intersections* will be of value to the reader throughout their professional career. The book is divided into four parts with chapters of research and theory interspersed with thought pieces to provide personal stories to integrate the research and theory into lived experience. Each thought piece ends with questions to inspire readers to engage with the topic. Part One: *Who is a First-generation College Student?* provides the reader an entrée into the topic, with up-to-date data on both four-year and two-year colleges. Part One ends with a thought piece that asks the reader to pull together some of the big ideas before moving on to look more closely at students' identities. Part Two: *The Intersection of Identity* shares the research, experience and thoughts of authors in relation to the individual and overlapping identities of LGBT, low-income, white, African-American, Latinx, Native American, undocumented, female, and male students who are all also first-generation college students. Part Three: *Programs and Practices* is an introduction to practices, policies and programs across the country. This section offers promise and direction for future work as institutions try to find a successful array of approaches to make the campus an inclusive place for the diverse population of first-generation college students.

***Diversity and Inclusion on Campus*** Rachelle Winkle-Wagner 2013-09-05 As scholars and practitioners in higher education attempt to embrace and lead diversity efforts, it is imperative that they have an understanding of the issues that affect historically underrepresented students. Using an intersectional approach that connects the categories of race, class, and gender, *Diversity and Inclusion on Campus* comprehensively covers the range of college experiences, from gaining access to higher education to successfully persisting through degree programs. Authors Winkle-Wagner and Locks bridge research, theory, and practice related to the ways that peers, faculty, administrators, and institutions can and do influence racially and ethnically underrepresented students' experiences. This book is an invaluable resource for future and current higher education and student affairs practitioners working toward full inclusion and participation for all students in higher education. Special features: Chapter Case Studies—cases written by on-the-ground practitioners help readers make meaningful connections between theory, research, and practice. Coverage of Theory and Research—each chapter provides a systematic treatment of the literature and research related to underrepresented students' experiences of getting into college, getting through college, and getting out of college. Despite recent gains in postsecondary enrollment, the Latino/a population is severely underrepresented when it comes to baccalaureate attainment. Hispanic-serving institutions (HSIs) will play a critical role in turning the tide, but there is little existing research about these institutions. This volume synthesizes: Existing research on HSIs, emerging HSIs, as well as research about Latino/a students themselves, A wide range of best practices across institutional types, and Examples of

service to undocumented students in states where they do and do not qualify for in-state tuition benefits. Topics include Latino/a undergraduate student success, graduate student success, community colleges, four-year institutions, financial aid, and undocumented students. This is the 172nd volume of the Jossey-Bass quarterly report series *New Directions for Higher Education*. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

**Understanding and Supporting Undocumented Students** Jerry Price 2010-10-19 This volume is about a student group whose particular needs are not well understood: students without legal residency status, better known as undocumented students. Student affairs professionals may know that undocumented students are on campus, but they often know little about them. For many of these students, this is by design: they choose to exist in the campus shadows to avoid sharing their secret and jeopardizing their status. Their fear of being discovered is understandable: they believe that they could be deported if their residency status were disclosed. This volume provides a broad overview of the factors that contribute to the experiences of undocumented students. It examines the applicable federal and state laws and policies, the students' precollege experiences, their academic and socioemotional experiences on campus, and their lack of professional employment opportunities after college. However, when it comes to understanding the experiences of undocumented students, the whole is greater than sum of its parts. Understanding these students—their experiences and their needs—requires more than simply understanding the individual components of their social, cultural, and legal environment. This volume also contains the actual stories of undocumented students, graphically illustrating the cumulative effect their legal status has on their day-to-day lives. This is the 130th volume of the Jossey-Bass higher education quarterly report series *New Directions for Student Services*. An indispensable resource for vice presidents of student affairs, deans of students, student counselors, and other student services professionals, *New Directions for Student Services* offers guidelines and programs for aiding students in their total development: emotional, social, physical, and intellectual.

*Contemporary Issues in Higher Education* Marybeth Gasman 2018-12-12 The latest text in the Core Concepts in Higher Education series, this volume speaks to the complex dimensions that higher education scholars and educators need to understand about the shifting role of postsecondary education in the United States. Chapter authors clarify current issues affecting the field, and offer fresh perspectives articulating how policy, demographic, and institutional changes influence the everyday practices of those who work in higher education. This book explores macro perspectives affecting institutional decision-making and processes as well as students' perspectives on campus—from colleges' credentialing procedures to the current demographic changes in students' enrollments, to students' social identities. Guiding questions at the end of each chapter offer readers an opportunity to frame discussions in which they can engage and invite readers to consider avenues for future research and exploration. This is a valuable resource for graduate students, administrators, and researchers who seek to understand and improve the policies and contexts of higher education today.

*Engaged Research and Practice* Betty Overton 2016-11-30 What practices can researchers use to gain a more nuanced understanding of educational issues in the community and be part of the solution to those issues? *Engaged Research and Practice* is about two prevailing and complementary ideas that have surfaced in the higher education arena: engaged research and higher education for the public good. Engaged research is scholarship that not only attempts to open up new knowledge, but it does so with a sense that the new knowledge, insight and directions have a direct relationship to needs and problems within our communities, institutions, and policy arenas. Engaged, actionable, or participatory research and scholarship attempts to tackle the identified issues of our communities and society. This handbook offers important insights and tangible examples of how higher education leaders may work directly with communities and in policy settings to understand the deeper meanings often lost in conversations about educational opportunity. Each chapter addresses the ways in which faculty, community and administrative leaders may connect research and practice through unique research projects. The authors offer clear explanations of "how" their engaged research was conducted to illustrate explicit pathways for practitioners. This book also includes short narratives where authors involved with this research reflect on their experiences and the lessons they have learned while immersed in community and policy related work.

*College Students in the United States* Kristen A. Renn 2012-11-05 *College Students in the United States* accounts for contemporary and anticipated student demographics and enrollment patterns, a wide variety of campus environments and a range of outcomes including learning, development, and achievement. Throughout the book, the differing experiences, needs, and outcomes of students across the range of "traditional" (18-24 years old, full-time students) and non-traditional (for example, adult and returning learners, veterans, recent immigrants) are highlighted. The book is organized, for use as a stand-alone resource, around Alexander Astin's Inputs-Environment-Outputs (I-E-O) framework.

*Shifting the Mindset* Kathy L. Guthrie 2021-08-01 Calling others in to lead for social justice has never been more important. In a world plagued by multiple and overlapping pandemics and other crises, the cost of leadership failures is constantly rising. Leadership education is responding to these challenges by centering cultural relevance, critical pedagogies, and important issues of identity, capacity, and efficacy in the preparation of emerging learners. Meeting the global demand for social justice requires thoughtful, innovative, and engaged praxes by all leadership educators. Alongside a cadre of diverse authors, we intend to shift the mindset of leadership education toward forward-thinking and holistic solutions, empowering our students to build a fairer and more equitable world for themselves and others. *Shifting the Mindset: Socially Just Leadership Education* widens and deepens the discourse begun in *Changing the Narrative: Socially Just Leadership Education*. Our contributors' ideas occur into two parts: the first examines student social identities otherwise underrepresented in existing leadership education literature. The second portion illuminates key factors of leadership learning contexts frequently under- or unattended in both leadership education and social justice education. Every chapter includes critical considerations and practical guidance for educators striving to meet the leadership demands of an increasingly unjust world. Taken together, these thinking, planning, and acting tools augment the potential of educators who are preparing leaders under uncertain conditions. We envision this book as an essential element of the leadership learning toolkit of socially just leadership educators at all levels, between contexts, and across varying amounts of education, influence, and experience. You are needed now more than ever before. We, once again, invite you to our ongoing fight for fairness, freedom, and a brighter future for all.

**Handbook of the Sociology of Education in the 21st Century** Barbara Schneider 2018-10-10 This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today's populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

**Disability in Higher Education** Nancy J. Evans 2017-03-06 Create campuses inclusive and supportive of disabled students, staff, and faculty *Disability in Higher Education: A Social Justice Approach* examines how disability is conceptualized in higher education and ways in which students, faculty, and staff with disabilities are viewed and served on college campuses. Drawing on multiple theoretical frameworks, research, and experience creating inclusive campuses, this text offers a new framework for understanding disability using a social justice lens. Many institutions focus solely on legal access and accommodation, enabling a system of exclusion and oppression.

However, using principles of universal design, social justice, and other inclusive practices, campus environments

can be transformed into more inclusive and equitable settings for all constituents. The authors consider the experiences of students, faculty, and staff with disabilities and offer strategies for addressing ableism within a variety of settings, including classrooms, residence halls, admissions and orientation, student organizations, career development, and counseling. They also expand traditional student affairs understandings of disability issues by including chapters on technology, law, theory, and disability services. Using social justice principles, the discussion spans the entire college experience of individuals with disabilities, and avoids any single-issue focus such as

physical accessibility or classroom accommodations. The book will help readers: Consider issues in addition to access and accommodation Use principles of universal design to benefit students and employees in academic, cocurricular, and employment settings Understand how disability interacts with multiple aspects of identity and experience. Despite their best intentions, college personnel frequently approach disability from the singular perspective of access to the exclusion of other important issues. This book provides strategies for addressing ableism in the assumptions, policies and practices, organizational structures, attitudes, and physical structures of higher education.
